28-Year-Old Pro Basketball Player Dies of Heart Attack — Less Than 2 Years After Telling Fans Pfizer Shots Led Him to Develop Vaccine-Induced Myocarditis

Professional basketball player Óscar Cabrera Adames died last week during a stress test at a health center in the Dominican Republic. In December 2021, Cabrera Adames collapsed on the court during a game — he blamed the incident on vaccine-induced myocarditis.

Miss a day, miss a lot. *Subscribe to The Defender's Top News of the Day.* ***It's free.***

Professional basketball player Óscar Cabrera Adames died last week at a health center in the Dominican Republic after an apparent heart attack, Fox News reported.

Sports commentator Héctor Gómez first broke the news on Instagram that the 28-year-old Dominican player, who plays in the Spanish professional league, had been undergoing a stress test when he died.

It is unclear, according to reports, whether the stress test — designed to examine heart functioning during physical activity — precipitated the heart attack.

Cabrera Adames previously was hospitalized after collapsing on the court during a December 2021 game. At the time, he blamed his collapse on COVID-19 vaccine-induced myocarditis, posting on social media:

> "I got a damn Myocarditis from taking a f—ing vaccine. (I got 2 doses of Pfizer) And I knew it! Many people warned me."

Cabrera Adames wrote that he was required to get the vaccine in order to continue playing professionally.

> "It was compulsory or I couldn't work. I am an international professional athlete and I am playing in Spain. I have no health problems, nothing, not hereditary, no asthma, NOTHING! I suddenly collapsed to the ground in the middle of a match and almost died. I'm still recovering and I've had 11 different cardiology tests done and guess? They find nothing."

He said doctors told him he could not play for at least five months until his heart inflammation went down.

Research shows the effects of vaccine-induced myocarditis can last much longer than five months.

A fan posted Cabrera Adames' original post alongside a video of him collapsing on the court in 2021.

Some media outlets, including Newsweek, called allegations that Cabrera Adames' reported vaccine-induced myocarditis is linked to his heart attack "conspiracy theories."

Myocarditis is a debilitating cardiac condition. Severe myocarditis can permanently damage the heart muscle, possibly causing heart failure.

The Centers for Disease Control and Prevention (CDC) reports that myocarditis is a serious adverse event that global evidence shows can be caused by the COVID-19 vaccine, particularly among young men.

Cardiologist Peter A. McCullough, M.D., MPH, told The Defender in an email that Cabrera Adames' death, along with his previously reported myocarditis, was concerning and should be investigated further.

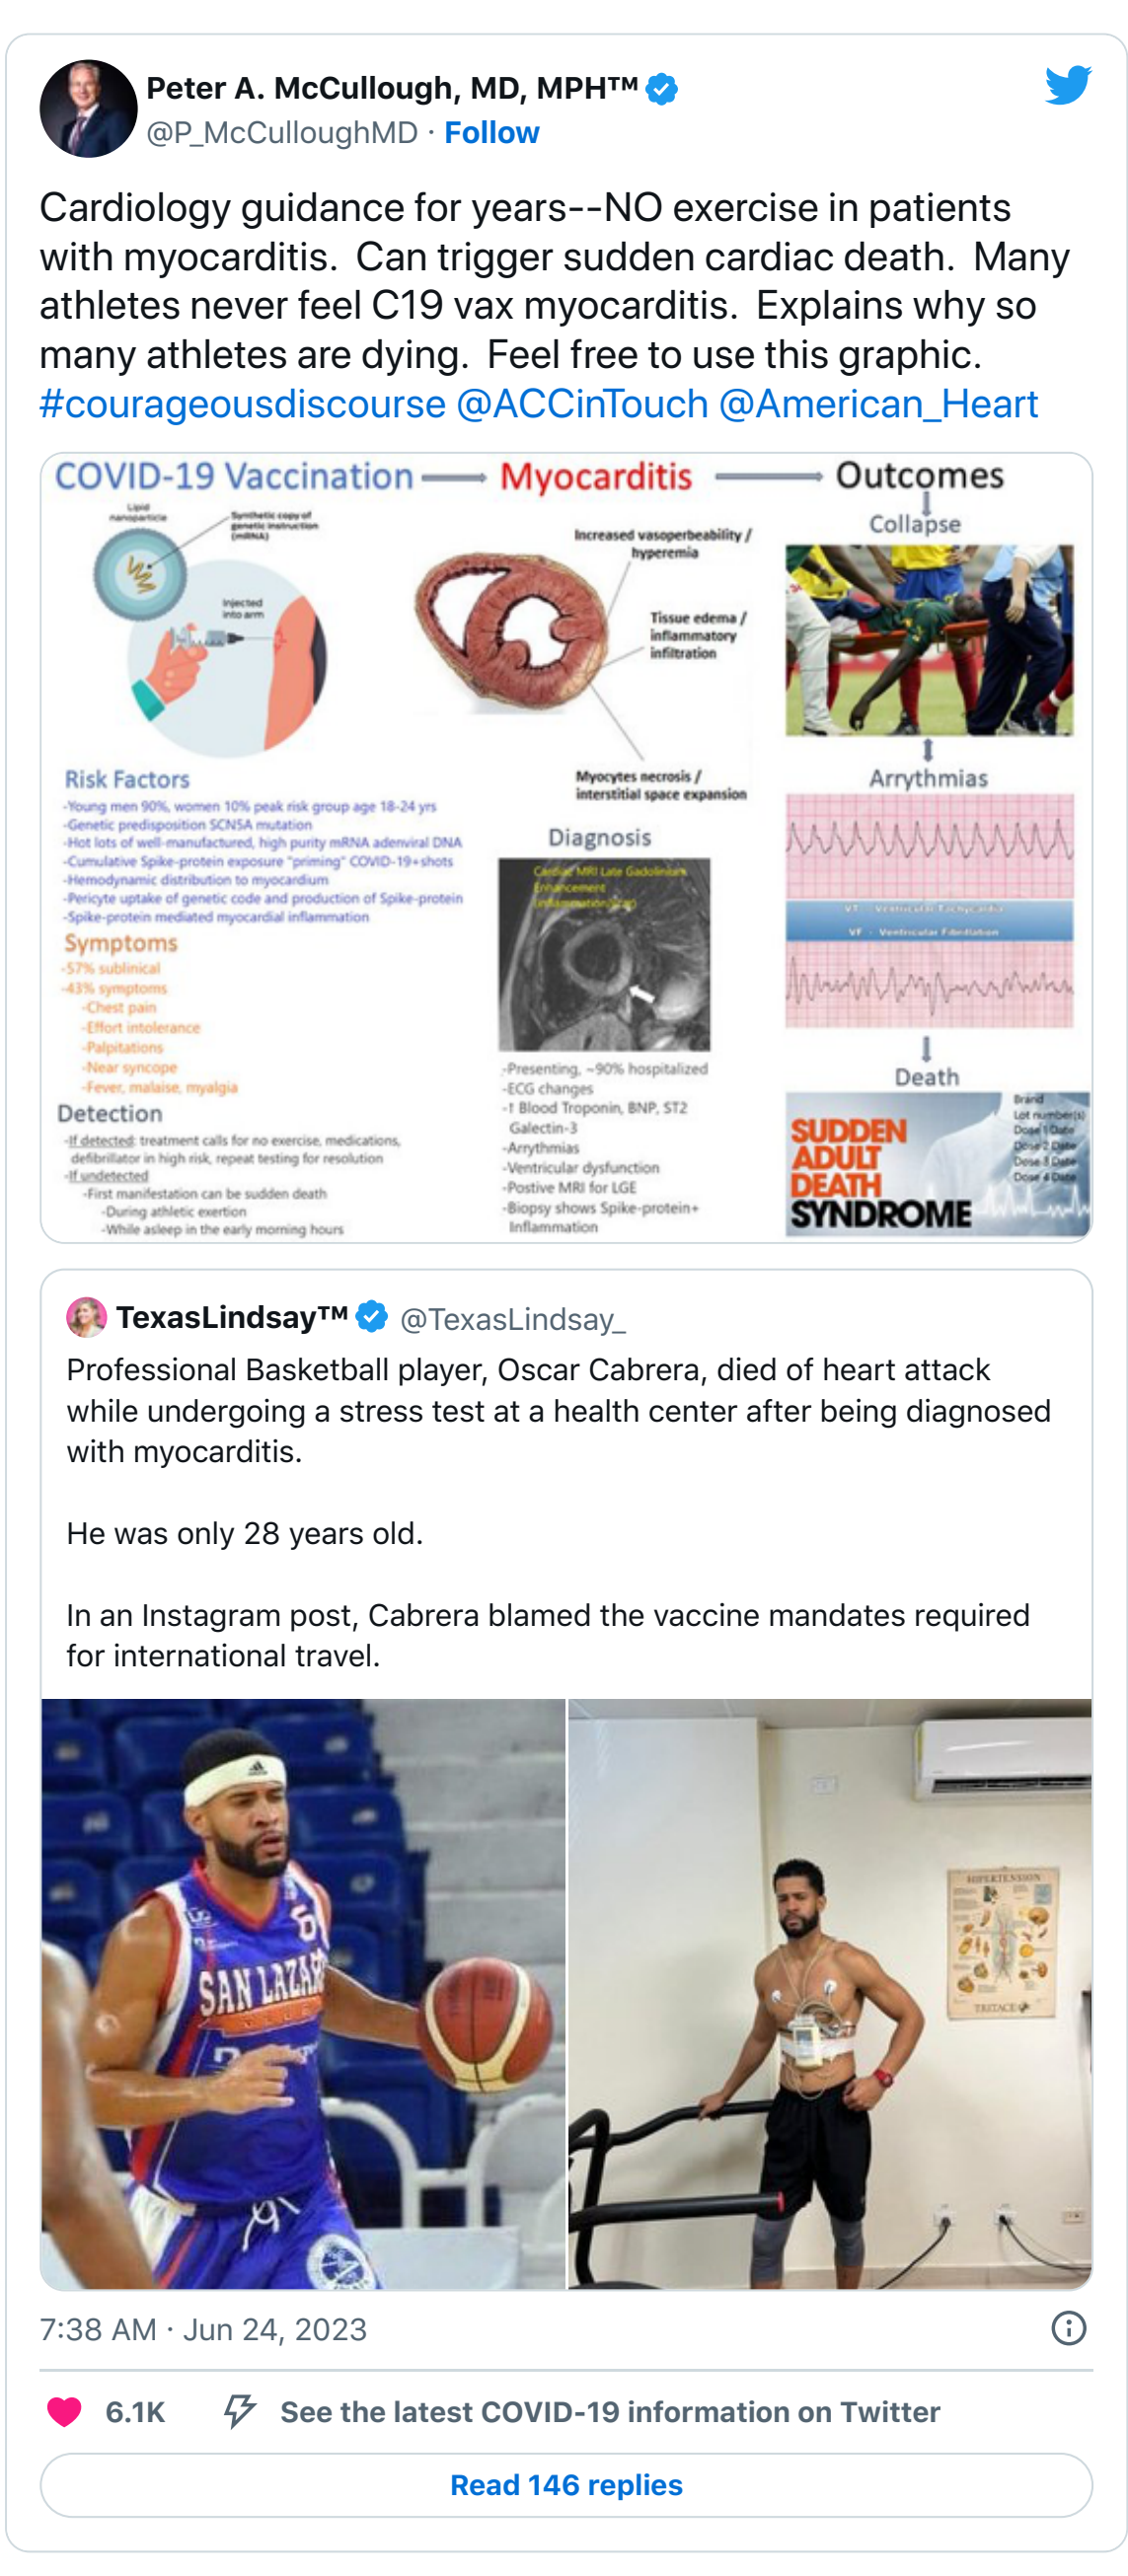
He said:

> "I am deeply concerned that his reported symptomatic myocarditis was in 2021 and now he dies on a routine stress test in 2023. This calls for an autopsy and assessment of his vaccine records, prior blood tests, ECGs, echocardiograms, and MRIs for clues to his risks for fatal COVID-19 vaccine-induced myocarditis."

According to Basketball Insiders:

> "Up to this point, we are yet to have an official statement on the cause of Oscar Cabrera Adames' death. All we know is that myocarditis restricts your heart's ability to pump blood, and most cases ends in sudden death due to heart failure."

McCullough tweeted that one reason so many athletes are dying suddenly is because they are unaware they have myocarditis and people with myocarditis should avoid exercise.



Peter A. McCullough, MD, MPH™

Cardiology guidance for years--NO exercise in patients with myocarditis. Can trigger sudden cardiac death. Many athletes never feel C19 vax myocarditis. Explains why so many athletes are dying. Feel free to use this graphic. #courageousdiscourse @ACCinTouch @American_Heart

TexasLindsay™ @TexasLindsay_

Professional Basketball player, Oscar Cabrera, died of heart attack while undergoing a stress test at a health center after being diagnosed with myocarditis.

He was only 28 years old.

In an Instagram post, Cabrera blamed the vaccine mandates required for international travel.

The CDC revealed in a May 2021 report it was aware that myocarditis and pericarditis were adverse events associated with the COVID-19 mRNA vaccines, particularly in young men.

But evidence shows the CDC and U.S. Food and Drug Administration (FDA) were aware of myocarditis safety signals as early as Feb. 19, but hid the data from the public until after the FDA granted Emergency Use Authorization and the CDC recommended the vaccination of children ages 12-15.

Professional sports leagues, such as the NFL, started mandating the vaccines in August 2021 — that was after the FDA in June 2021 added a warning about the risk of myocarditis and pericarditis to fact sheets for Moderna and Pfizer following the CDC's May 2021 report.

Since then, there has been a spike in the number of sudden deaths among athletes. Mercola reported that since March 2021, there was an unprecedented surge in cardiac arrest and other heart issues among elite athletes, citing the fact that 769 athletes collapsed with heart issues on the field during a game between March 2021 and March 2022.

The average age of those athletes who suffered cardiac arrest is just 23 years old.

According to Edward Dowd, a Swiss study documented an average of 29 deaths per year in that demographic prior to 2021. Dowd, a former BlackRock fund manager, is the author of "'Cause Unknown': The Epidemic of Sudden Deaths in 2021 and 2022."

More confirmation of what we already know to be true. I wonder what it will take for everyone to see the truth. I have spoken to people who will not even consider that they were lied to and fooled into believing that they did the right thing by getting jabbed. Just proves that saying by Samuel Clemens, " It is easier to fool someone than to convince them that they've been fooled."

folketvinner54 → holisticpoet 7 days ago
I fear we will see many, many more deaths from the "jab" in the coming years. I'm fearful of all vaccinations now. Need a tetanus shot but will pass on that now as I don't trust Big Pharma, medical community or my own dr.

Vaccines Will Do The Job, Slowly and Quietly, No One Will Even Know It's A Holocaust!

"Pfizer Vax gave a Mouse Turbo Cancer"
B-cell lymphoblastic lymphoma following intravenous BNT162b2 mRNA booster in a BALB/c mouse: A case report.

Herein, we present the first case of B-cell lymphoblastic lymphoma following intravenous high-dose mRNA COVID-19 vaccination (BNT162b2) in a BALB/c mouse. Two days following booster vaccination (i.e., 16 days after prime), at only 14 weeks of age, our animal suffered spontaneous death with marked organomegaly and diffuse malignant infiltration of multiple extranodal organs (heart, lung, liver, kidney, spleen) by lymphoid neoplasm.

DO fear all shots. Most if not all are unnecessary unless you are traveling into the mission field in polluted areas of third world countries.

Same goes for allergy shots. The garbage inside of them are very harming.

Agreed. I say that all the time. The reason most will never be convinced they've been fooled is because they don't want to admit their world view has been wrong all along. An understanding of mass psychosis formation helps decode our compliant society.

ralphdevane@msn.com → holisticpoet 6 days ago
We have friends who fell for the lies and have admitted their mistake and suspect, if not know, it could cost them their lives. Imagine if you believed then convinced someone close to you to get the shot(s). There has to be a lot of guilt and angst going around now, despite some of the lemmings still wearing masks in full faith of their efficacy.

Now here's where the analogy about the boiling water and the two frogs make sense. The government has been getting people ready for this vaccine for years by giving useless vaccines (mandatory for school) that did nothing. Well it half worked, about half the people were fighting each other to be the first to get an untested vaccine. Glad I was in the group of frogs that jumped out of the boiling water.

flothow 7 days ago
Stop the covid vaccines. They don't work and are killing people. Now CDC recommends more vaccines for infants!!!? I will not follow any CDC recommendations until that nest of vipers gets cleaned out!
33 0 Reply • Share ›

Cheryl Nelson → flothow 7 days ago
Read Turtles all the way down. You will never go near another vaccine. Written by two Israeli doctors who remained anonymous fearing for their lives because their researched revealed the absolute fraud behind the vaccine industry. Vaccines not tested against placebos. Instead tested against older vaccines, which in turn were never proved to be safe. This is done so that adverse effects are glossed over and not acknowledge. Absolutely criminal.
13 0 Reply • Share ›

Ricky Ricardo 7 days ago
...and what did you expect the evil and corrupt media to say? The rhetoric is always the same..."unexplained", "sudden death", "very rare", blah, blah - and the evil continues! The shots are **experimental**; and even if they were "approved", it's **illegal** to **force** any medical intervention on anyone! What ever happened to the **law**?
22 0 Reply • Share ›

bjo59 → Ricky Ricardo 7 days ago
Court cases proved that the law no longer functions in many cases. I actually couldn't believe it when the EUA regulation that (can't mandate EUA pharmaceuticals under threat of loss of livelihood) was completely ignored by the courts but it clearly showed that the law is only the law if courts feel like upholding it.

What else can people expect, when a corrupt industry makes billions promoting toxic and defective products, which wipe out the immune system; injuring and killing the recipients. This has been going on for generations now...and hopefully enough will awaken to put an end to the health "benefits" being provided...and see the FINAL EXIT of a SOULLESS INDUSTRY.
11 0 Reply • Share ›

Barbara 7 days ago
This is horrible. Every day I read about young people dying and many are active and physically fit. God bless this man for telling the truth about his health situation as his honesty will help save other lives.
I pray he is in heaven and condolences to his family and teammates.
11 0 Reply • Share ›

bjo59 7 days ago
When the mandated vaccines first began I had already done research to find out if they could force them on people. When I read the clear statement on the EUA regulation that emergency use authorized pharmaceuticals could not be required of people under threat of loss of employment, I breathed a sigh of relief (I would not have to potentially quit my job and have no income) but it wasn't long until we all found out that the courts do not care one fig what the EUA regulation says. People should decide right now whether they are willing to be injected with mRNA vaccines again so as not lose their livelihoods or whether they will do whatever it takes to not be pressured into risking their lives. If people make the decision right now, they will be better prepared when the the public-private partnership between government and Big Pharma decide to do this again - won't have to think about it, the decision has already been made with a clear head. After the H1N1 trial run in 2009, I knew that I would rather lose my livelihood or go to jail than allow a "forced" injection into my body - the only thing I was worried about back in the Spring of 2020 was how long it was going to take for them to release a vaccine and then set about trying to face it on people. It happened a lot quicker than I thought possible!

TC Ramos → bjo59 6 days ago
Yup. Quickly. That's why some call it a "plandemic" which I believe is accurate. A lot of practice went into it.
2 0 Reply • Share ›

Someone 7 days ago
This is just proof that everyone who was involved in trying to force people to vaccinate by threatening their jobs should be tried for murder, starting with the idiots who claimed the jabs were "safe and effective" and to challenge the liability protection on vaccines in general. Pfizer and Moderna absolutely should be held accountable for their mass murder since they knew full well the harms these jabs could cause.

OFFICIAL NIH STATEMENT: "Nothing to see here people, nothing to do with the GatesFalsi life taki,.., I mean life-saving unknown experimental vaccines.. Right wing propaganda again. Obviously, the basketball player was fat, lazy, and out of shape. Shouldn't have been on the court. We can name 3 people who have not been affected by the covid vaccines (as soon as they come out of thier coma's).."
7 0 Reply • Share ›

annemat 7 days ago
I am never surprised when governments betray the people but for public health to join the ranks is unforgivable. They preyed on the trust the populations had in public health and were the pharmaceutical industries stealth weapon to ensure they captured as many people as possible to take the experimental injections. This has been going on for a very long time and the alliance has been built up slowly. To trust public health now and in the future is impossible for me.

"He said doctors told him he could not play for at least five months until his heart inflammation went down.
Research shows the effects of vaccine-induced myocarditis can last much longer than five months."

I saw a video of Dr. Peter Marks, of the FDA, in a documentary. Marks downplayed Myocarditis, calling it a "twinge of pain" that one went to the hospital for and was treated then goes home and doesn't exercise for three months, then goes on with their normal life.

The public is not being told the truth by public health officials.

1 0 Reply • Share ›

ralphdevane@msn.com
6 days ago

Tragically and disgustingly, he won't be the last one. It would be one thing if the pharmaceutical companies were unaware of the effects of their "jab" euphemistically called a "vaccine", but they did know even as early as Dr. Birx' admission of the WH Covid panel that the vaccines would not protect against the virus.
